Non Technical Skills

- Strong Problem-solving:** Demonstrated ability to analyze complex technical challenges, identify root causes, and develop effective solutions.
- Effective Communication:** Proficient in conveying technical concepts to non-technical stakeholders, facilitating collaboration and understanding between teams.
- Team Collaboration:** Proven track record of working effectively in cross-functional teams, fostering a positive and cooperative work environment.
- Adaptability:** Quick learner with the ability to adapt to changing technologies and project requirements, ensuring successful project delivery.

Mohamed Bouras

Full Stack JS Developer

My passion lies in working as a Full Stack JavaScript Developer, specifically with expertise in React, React Native, Node.js, Express, MySQL, and MongoDB. I enjoy collaborating with teams and have a strong ability to quickly learn and apply new technologies. My goal is to leverage my skills and knowledge to create innovative and robust web and mobile applications using the full stack JavaScript ecosystem.

projects

Education platform

2023

As part of my projects, I successfully implemented an Education Platform, a full stack application, using React, Node.js, and MySQL. In this project, my primary responsibilities included the following:

- User Interface Design:** Developed a user-friendly UI for the login and signup functionalities, ensuring an intuitive and visually appealing experience for users.
- Authentication and Authorization:** Implemented secure authentication and authorization mechanisms using JWT (JSON Web Tokens).
- Database Schema Creation:** Designed and created an efficient database schema in MySQL, ensuring proper organization and optimal storage of educational content, user data, and authentication details.
- Backend API Development:** Utilizing Node.js and Express, I handled backend API requests for the courses component. This involved implementing CRUD operations, and ensuring data integrity.

Sportify: Full Stack Mobile App for Sports Enthusiasts 2023

During my professional journey, I successfully implemented Sportify, a dynamic full stack mobile application that connects users with coaches and offers sports-related products. This app enhances the user experience through personalized programs, product recommendations, and a chat interface for direct communication with coaches. Sportify leverages cutting-edge technologies, including React Native, Expo, Node.js, Express, Socket.io, and MySQL.

My key contributions to the Sportify project encompassed the following:

- Authentication and Authorization:** Implemented a secure user authentication and authorization system using JWT (JSON Web Tokens). Integrated Nodemailer for seamless email verification and password reset functionality.
- Full Stack Chatroom Feature:** Developed a real-time chatroom feature, including both the user interface (UI) and backend implementation. Utilized Socket.io for seamless interaction and prompt query resolution between users and coaches.
- Coach Profile Interface:** Designed and implemented an intuitive coach profile interface, enabling coaches to showcase their credentials, expertise, and additional information. This interface establishes credibility and effectively presents their services within the Sportify community.
